WHAT: Protest Walmart's Profiting from America's Economic Downturn

At a time when gas prices are soaring, jobs are being lost, wages are stagnating, and hard working American families are struggling to get by, Walmart announced that its sales for June are up 5.8% from last year. While Walmart is no doubt celebrating its increased sales and the billions it will rake in this year, the rest of the country is struggling to get by. Instead of celebrating, Wal-Mart should make real changes to support its workers that would make our country, and our economy, stronger.
